Hardworking

## Summary

Software developer with 2 years experience in front-end development with expertise in Angular 6. Adept in developing entire front-end of an application including unit tests to attain utmost precision. Organized, sincere and quality-oriented with proactive and hard-working nature

## Work Experience

- Since Oct'17 Software Engineer - HCL technologies | Noida 2 Years  
Part of front-end team, as a developer, my key responsibility is to migrate entire front-end application from AngularJS/1.0 to Angular 6. Learned and contributed towards multiple stages of the development.
- Being a part of core migration team, worked from scratch in developing the application, beginning from the architecture. Understanding the requirements of the application, starting from module to component and services.
  - Used multiple third party library, including ngrx store/redux for state management
  - Developed custom pipes, directives, validators for adding customized features to the application.
  - Unit testing using Karma and Jasmine frameworks to ensure quality.
  - Manual testing in multiple environments.
  - Continuous regressions to find bugs and fix them.
- Developed entire front-end application for another client with entirely different architecture using reactJS.
- Worked on NodeJS to create mock APIs for internal use in case of any server failures. Created UI for the same as well using Angular 6.
- Jan-Apr'17 Job Intern - HCL Technologies | Noida 4 months  
-Artificial Intelligence based Chatbot for Financial Services  
-A bot that understands natural language and respond accordingly. This is an ongoing project which will also include machine learning at later stage.
- Jun-Jul'17 Student Coordinator - Admissions Department - Shiv Nadar University | Greater Noida 2 Months  
Responsible for coordinating campus tours for parents, solving their queries face to face and over telephonic conversation.

## Certificates

- Jun'19 Certified SAFe 4 Practitioner  
Scaled Agile Inc
- Sept'16 Programming for everybody (Getting started with Python)  
University of Michigan
- Oct'16 Python Data Structures  
University of Michigan

## Projects

- Cab Pooling Software
- Developed a website for cab pooling facility within an organization under Database Management using PHP and MySQL
- Puzzle Game
- Developed a JAVA Application for a Jigsaw Puzzle game under JAVA OOP Concepts
  - Developed an online portal for various functions of the placement cell under Software Engineering
