## Summary

Having an experience of 3 years in IT field and looking for a position in an environment that offers learning, challenges and opportunity to apply my technical, analytical and management skills to play a role in the growth and success of your organization.

## Experience

### 2019–Present Associate Application Developer / Fujitsu Consulting

- Working at onsite location for ST Microelectronics, a semiconductor manufacturing company helping them manage their quality non-compliance via portals.
- Used technologies such as spring boot, hibernate, Angular and advanced java to enable the portal making it compatible for both IE and chrome.
- Used web services to interact with the backend and material as well as AG grid in Angular to configure tables.
- Working on Agile methodologies with an eye towards improving on quality.

### 2016–2019 Senior System Engineer / Infosys Ltd

- Wrote maintainable and extensible code in a team environment for the client AT&T which helped the company manage their vendors and suppliers.
- Involved in writing complex procedures in PostgreSQL and Oracle.
- Completed tasks like analyzing requirements, coding, testing and documentation along with understanding of coding standards.
- Involved in defect resolution post deployment of code.
- Actively participated in defect planning, code reviews using Sonar tool and various team meetings.
